👤 Profile

Software Engineer with experience maintaining and extending production web applications using Python, JavaScript, React, Django, and .NET. Has worked on internal tools, API integrations, and database-backed features in live systems. Recently completed a Higher Diploma in Science in Computing.

🧠 Skills

Languages

Python, JavaScript, Java

Frameworks/Libraries

React, Django, .NET Core, Spring

Databases

PostgreSQL, MongoDB

Tools/Technologies

Git, AWS S3/RDS, Heroku

📁 Professional Experience

Nov 2023 – Mar 2024	Junior Software Engineer, <i>The School Tour Company</i> • Took ownership of a React-based internal application following significant project disruption, delivering a production-ready system that replaced a slow legacy platform and reduced sales quote turnaround times. • Refactored and rebuilt large portions of existing code, stabilizing incomplete and poorly structured components while delivering new features under minimal supervision. • Designed and implemented UI improvements to enhance usability for non-technical sales staff, enabling the application to be rolled out for active internal use. • Worked on a customer-facing payments portal, contributing to frontend development and API integration for online payments. • Mentored a graduate developer, assigning tasks, supporting manual testing efforts, and helping build foundational skills in frontend development and SQL.	Dublin
Jun 2023 – Nov 2023	Data Scientist, <i>Orcawise</i> • Developed and maintained Python-based web scrapers using Selenium to collect training data for large language model workflows. • Collaborated within a web scraping team, contributing scrapers and supporting other developers with debugging, data extraction logic, and scraper reliability. • Implemented techniques such as user-agent rotation, cookie handling, and IP rotation to improve scraper robustness, and applied basic NLP processing to prepare data prior to ingestion.	Remote
May 2023 – Jun 2023	Web Developer, <i>Freelance</i> Contracted to resolve several issues on a client's website which were affecting certificate printing and user interface.	Remote
Oct 2020 – Sep 2021	Web Developer, <i>Nebula Innovations</i> • Worked on a production web application for nursing home operations, supporting room management, cleaning workflows, and administrative functionality. • Developed and maintained features using C#, .NET, and Razor Pages, resolving front-end and back-end issues in a live system.	Drogheda (Remote)

Education & Formal Training

Jan 2025 – Dec 2025	Higher Diploma in Science in Computing , <i>National College of Ireland</i>	Dublin (Remote)
Mar 2023 – Jun 2023	Certificate of Science in Computing , <i>National College of Ireland</i>	Dublin (Remote)
Jul 2019 – Sep 2020	Full Stack Software Development Diploma , <i>Code Institute</i>	Dublin (Remote)

Portfolio - <https://www.allen-gleeson.com/>

2025	AroundU Location-based social media platform built with Spring Boot GraphQL backend and Next.js frontend, featuring Google Maps integration and JWT authentication.
2025	Distilled Distributed educational system implementing microservices architecture with gRPC, Protocol Buffers, and service discovery using JmDNS.
2025	Bens Bakery E-commerce website with dynamic product catalog, shopping cart functionality, and interactive cake customization game built with vanilla JavaScript and Bootstrap.
2024	Mars Sols Full-stack web application visualizing real-time Mars weather data and rover imagery from NASA APIs using React, Node.js, and Chart.js.
2024	ADIG - Coffeeshop Hybrid Django and React application with AWS S3/RDS integration, featuring content management system for business owners to update site content independently.
2020	Ellas Design Full-stack e-commerce platform with Stripe payment integration, user profiles, order management, and admin product management using Django and PostgreSQL.
2020	Lazy Hunger Community recipe sharing platform built with Flask and MongoDB, enabling users to create, view, edit, and delete recipes with image uploads.
2020	Find Ireland Tourism website exploring Irish attractions with Google Maps API integration, Wikipedia API for location information, and WeatherBit API for real-time weather data.

Additional Experience

Jun 2025 – Present	Admin Support , <i>Meath Sports Partnership</i>	Remote
Sep 2022 – May 2023	Customer Service Advisor , <i>Capita</i>	Remote

Certificates

- ISTQB Foundation Level Software Testing
- Oracle Certified Associate, Java SE8
- Software Development: City & Guilds Level 2
